Sustainability Academy include: ISPO Lead Auditor Training, Refreshment ISPO Ministry of Agriculture No. 38 of 2020, Drone Training, AMDAL Preparation Training, AMDAL Basics, BNSP Training (PPPA, PPPU, PLB3, POPPA, POPPU, OPLB3) , etc.

TRAINING IT ACADEMY INDONESIA

CompTIA® TOGAF®

COBIT®
Design and Implementation
Certificate Program

IT Academy is a training provider with a focus on IT training that provides comprehensive guidance for all training participants.

The learning method used is by combining conventional learning systems with digital-based learning systems.

As a professional IT training provider, IT Academy will provide the best service. One of them is by collaborating with CompTIA/EC Council/Axelos in providing training.

INSPECTION

Inspection is an inspection that involves tests and measurement which are carried out based on certain characteristics with respect to the object of inspection. Inspection are carried out to inspect objects to ensure that they meet certain standards.

Inspection Purpose :

- ***Improve Quality.***
- ***Prevent problems caused by low quality, and reduce complaint.***
- ***Provides notification to mangement before a problem Becomes serious, so that management and the board of directors xan take further action.***

HUMAN RESOURCES **CONSULTANT**

HR Consultant is a professional who comes from outside the business or organization with the task of solving problems or meeting needs related to human resources. Often they are entrusted with providing the best solutions and recommendations to the management team.

HR Consultant Purpose :

- **Job analysis**
- **HR performance evaluation**
- **Recruitment process**
- **Corporate value and culture development**
- **Work load analysis**
- **Payroll system**

CALIBRATION LABORATORIUM

PT. Jasa Instrumentasi Teknologi

Calibration is the process of checking and adjusting the accuracy of measuring instruments by comparing them with standards/benchmarks. Calibration is necessary to ensure that the measurement results are accurate and consistent with other instruments.

Inspection Purpose :

- ***To determine the deviation of the truth that exists in a conventional value. This value is obtained from a predetermined measuring instrument.***
- ***To guarantee the measurement results, so that they comply with applicable standards. If done on an object, it is expected that the object can be calculated thoroughly without any errors.***
- ***To ensure accuracy, so as to support efforts to improve the quality of services or objects in the future.***
- ***To support the quality system applied to an object or activity and measure whether a tool is still suitable for use or not.***
- ***To achieve usable conditions, so that objects can be used optimally.***

ASSETS REGISTRATION

Used to track business fixed assets. This is simply a list of all the assets of the company. This list will record the name of the property, the location of the property, who is responsible for the property, the cost of the property, and the expected value of the property.

A good fixed asset record will also show the depreciation of the property since the date of purchase and show its present value. Businesses need to know where their assets are and in what condition. Property registers are also useful for the details needed to calculate depreciation and for tax purposes.
